Jim Ryan was a delightful asset to our organization's 9th anniversary celebration.

His talk on the pursuit of happiness as a conscious choice that we all have the freedom to make rang true with his audience. His delivery was frank and honest and completely without hype - yet logical and convincing enough to inspire even the most cynical among us.

He is the perfect antidote to the constant assault of doom and gloom perpetrated on us every day by the media. With an honesty that bespeaks a man who's "been there, done that" and a refreshing modesty that is rarely found in the guru-like motivational speakers of today, he uplifts and draws you into his way of thinking simply because it makes absolute sense to do so.
